

# The Difference Between Net Zero, Passive, and LEED-Certified Houses

Excited about BPC Green Builders' energy efficient home options  
but unsure which green certification you should build to?

Start with this handy infographic  
outlining the differences between  
Passive Houses, LEED-Certified  
residences, and Net Zero Homes  
in New York and Connecticut.

## BPC Only Builds Efficient Green Homes

All green building certifications have qualities that make them unique, but every home BPC Green Builders builds or retrofits offers extreme efficiency regardless of your certification status. Enjoy:

- ➔ Impressive energy savings
- ➔ High performance
- ➔ Durability & resiliency
- ➔ Higher resale value & prestige
- ➔ Low to no energy costs
- ➔ Healthy living environment
- ➔ Extreme comfort year-round
- ➔ Peace and quiet
- ➔ Clean indoor air
- ➔ Environmental benefits
